About These Data

This database shows the tuition and required fees at more than 3,300 colleges and universities in the academic years 2011-12 and 2010-11, as well as earlier years. Amounts from earlier years can be viewed by clicking on the institution's name.

Tuition and fees for both state and out-of-state residents are listed. The total for tuition, fees, room, and board is also shown for institutions providing those figures in 2011-12 and 2010-11.

If an institution charges state and out-of-state residents the same rate, the amount is shown only in the "In-State" column and "n/a" is shown in the "Out-of-State" column. The designation "n/a" means data were not available or not applicable.

Many institutions, including most community colleges, do not offer room and board. In those cases, no figures are shown under "Tuition, Fees, Room, and Board."

Figures under "% Change" reflect the change in the amount for in-state residents from 2010-11 to 2011-12.

An asterisk (*) indicates that an institution provided projected figures for 2011-12.

The data can be sorted by clicking on column headings.

The data do not reflect the cost of attendance at an institution after grants and other student aid are considered. This net cost is lower than the published fees shown.

The figures represent charges to first-time, full-time undergraduates based, typically, on a nine-month academic year of 30 semester hours or 45 quarter-hours.

Room-and-board fees charged by colleges may represent differing numbers of meals per week and so may not be comparable among institutions.

Amounts are not adjusted for inflation.

The College Board collected the figures for 2011-12 in its "Annual Survey of Colleges 2011." © 2011, the College Board. This material may not be copied, published, rewritten, or redistributed without permission.

Graduation Rates

Data Type: All degree-seeking students (NCES)

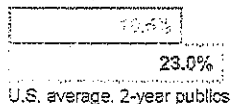

2010 Graduation rate

All counted undergraduates

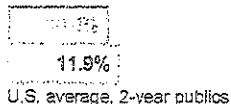

17.3% of all 7,596 counted students graduated in 150% time

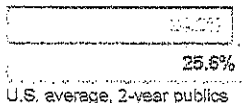

White 4,955 students

Black 810 students

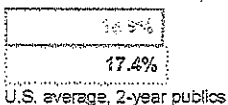

Asian 149 students

Hispanic 371 students

American Indian 1,052 students

How much of the 2007 entering class was included in the graduation rate?

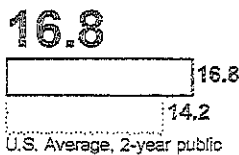

Not all undergraduates are included in the official graduation rate. The U.S. omits part-time freshmen and those who have attended college before, among others, from its graduation-rate survey. The outcomes for those students are not known.

Efficiency

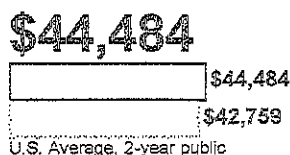

Completions per 100 students

The total number of undergraduate-level completions (degrees and certificate programs of at least one year in length) per 100 full-time equivalent undergraduates, based on total credit hours taken. It's the three-year average for 2008, 2009, and 2010.

Educational spending per completion

Estimated educational spending (expenses related to instruction, student services, academic support, institutional support, operations and maintenance) per academic award in 2010. Includes all certificates and degrees.

Educational spending per completion

\$56,397
